**Announcement date: Monday, June 3, 2024, at 5pm**

Kofola's first quarter results will include recent acquisitions. According to preliminary information, 1Q24 sales should be up 14% yoy. We expect EBITDA to grow +16.2% yoy to CZK253m. We are awaiting information on the performance of the recent acquisitions. We also expect Kofola's management to confirm its full-year targets.

The first quarter tends to be one of the two weakest in terms of seasonality. However, this start of the year should at least partly include recent acquisitions. In its annual report (April 11, 2024), Kofola published its sales development for the first quarter. Revenues should grow by 14% yoy on volume growth of +7% yoy. In our forecasts, we expect revenues of CZK1,977m (+15.5% yoy). The overall growth is a combination of higher volumes and higher prices. We expect that this will reflect lower energy and material prices. According to our estimates, EBITDA is expected to increase +16.2% yoy to CZK253m. Due to the negative development of exchange rates, the net profit fell to a slight loss. We estimate the net loss for the first quarter at CZK-2m (CZK34m in 1Q23).

With recent acquisitions, apple orchards, a stake in a Colombian coffee plantation, beverage vending machines and, most importantly, a 51% stake in Pivovary CZ, we expect Kofola to show data on its performance.

**FY guidance:** We expect Kofola management to reiterate full-year targets. Standalone Kofola is expected to achieve EBITDA of CZK1.35-1.45bn this year, with revenues expected to grow +7% yoy. Including the acquired companies, EBITDA should be in the range of CZK1.55-1.80bn and sales growth should be +25% yoy. Our total EBITDA estimate is CZK1.5-1.6bn. Traditionally, Kofola publishes sales development for individual months of the next quarter (April, May). Our expectation is that there could be a confirmation of the growth potential, similar to 1Q24.

The recommendation in this document and/or the document itself was not disclosed to the issuer before its dissemination.

This recommendation is not updated at regular intervals. The date of the next update has not yet been determined and finally will be influenced by relevant changes of the facts used as the ground for this recommendation to reflect proper development in the industry and/or the analyzed company.

The main methods KB is using for setting target price for stocks are discounted free cash flow analysis and sector comparison. Other methods may also be used if deemed appropriate by the analyst (e.g. sum of parts valuation, discounted dividend valuation, discount / premium to NAV). Target price is set for the time period of 12 months. KB is using three grades of investment recommendation: buy, hold and sell. The recommendation is set for the time period of the next 3-6 months. The most important factor for setting the recommendation is the difference between actual market price and target price calculated by KB equity research. The recommendation also reflects other factors the analyst expects to influence the stock and market in the time period of 3-6 months after its publication. The target price substantially above current price does not automatically mean a buy recommendation for the 3-6 months following the first period of 3-6 months since publication of the recommendation. Valuation methods and factors key for setting the recommendation are explained in the text of each analysis.

The chart below shows the structure of grades of valid investment recommendations of equity research of KB Economic & Strategy Research (8 recommendations).

#### Investment recommendations of KB equity research

#### KB Equity Research ratings on a 12 month period

**BUY:** absolute total shareholder return forecast of 15% or more over a 12 month period.

**HOLD:** absolute total shareholder return forecast between 0% and +15% over a 12 month period.

**SELL:** absolute total shareholder return forecast below 0% over a 12 month period.

Total shareholder return means forecast share price appreciation plus all forecast cash dividend income, including income from special dividends, paid during the 12 month period. Ratings are determined by the ranges described above at the time of the initiation of coverage or a change in rating (subject to limited management discretion). At other times, ratings may fall outside of these ranges because of market price movements and/or other short term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by research management.
